Recently the Further Maths study design introduced 20% more compulsory content for all students to learn. Further Maths is now even more of a challenging subject which can have a major impact on your ATAR.

This is great opportunity to spend a day discussing, applying and reviewing the major components of the core section and each of the modules you have studied during the year. Unlike a revision session at the end of the year, this day is dedicated particularly to the modules where a good component of time can be spent on the routine and 'trickier' elements. Examination style questions will be used to highlight the language, structure and key ideas that link back to the content given in the course.

To get the best from the day please bring your calculator and summary book with you.

Book in for this unique day and you can join the sessions that interest you and have a break during the sessions that are not part of your program. This program has been months in the making and is guaranteed to be a great way to consolidate the course during the Term 3 break and to ensure you are on the right track.

The day's format is as follows. Book in for the day and only attend the sessions that are relevant for you:

09:30-10:20	Geometry and Measurement
10:30-11:20	Matrices
11:30-12:45	Core (Statistics)
13:00-13:50	Core (Recursion and Financial Modelling)
14:00-14:50	Networks and Decision Mathematics
15:00-15:50	Graphs and Relations
